

The Maverick

by Quick Draw Tarpaulin Systems™

NEW

Quick Draw Tarpaulin Systems, the industry leader in rolling tarp systems for flatbed trucks and trailers, is proud to introduce the “**Maverick**”; the next generation of side kits for flatbed vehicles. This innovative side kit tarp system features a smooth **aerodynamic** outer surface designed to increase fuel efficiency, side panels located at maximum vehicle width to **increase cargo space**, a tarp and post hold down technique that **eliminates bungee cords** and tarp tensioning mechanism that pulls the tarp tight. The Maverick can be **easily installed** on any standard flatbed vehicle.

by

Product Features:

Smooth Outer Surface

Aerodynamic headboard and posts increase fuel efficiency.

Maximum Width

Side panels are located at the maximum width of vehicle to allow for more cargo space.

No Bungee Cords Required

A new technology is used for holding down the tarp and posts.

Tight Tarp

A tarp tensioning mechanism pulls the tarp towards the back of the vehicle.

Rubber Seal

Located along the bottom of each side panel ensures debris stays out of the trailer while allowing space for tie down straps to pass through. This also allows the use of winches or chains without removing panels.

Back Doors

Allow quick access to the inside of the vehicle.

Fully Removable Components

All components are easily removable similar to conventional side kits.

Compatibility

The Maverick can be easily installed on any standard flatbed vehicle designed to use a conventional side kit.

Rear Tensioning Device

Makes it easy to tighten the tarp from front to back and side to side.

Warranty

1 year warranty covers manufacturing defects.
