**NOT JUST ANOTHER TARP SYSTEM**

# ONE CHOICE STANDS ABOVE THE REST

## Most Full-Service Branches

Quick Draw continues to grow its ability to serve customers better by having **8 BRANCHES** that are fully capable of installations and repairs. Combine these branches with over **25 QUALIFIED DEALERS** across North America and Quick Draw provides its customers with superb access to repair facilities whenever and wherever needed.

**+ OVER 25 DEALERS**

## Lowest Price Over Product Life

Quick Draw has worked with several large customers who own a combination of Quick Draw and competitive tarp systems to compare costs over several years of operation. The results show Quick Draw to be the lowest cost tarp system over a 3 to 5 year period. With Quick Draw, you will not be surprised with excessive downtime and repair costs down the road.

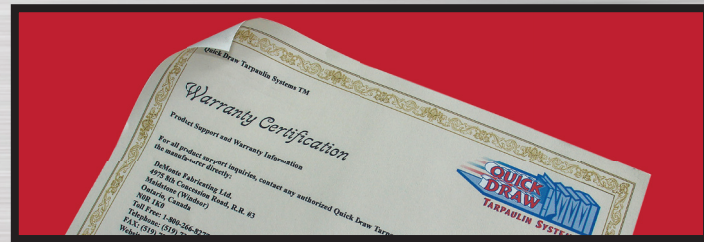

## Honest Fair Reasonable Pricing For All

Quick Draw has a price book and uses it for all customers! Amongst Quick Draw customers, there are no poor chumps who paid more to compensate for shrewd customers who paid less. Common repair work is also priced by the book. Quick Draw truly provides honest and fair pricing for all.

## Most Feature-Rich Base Price

For each feature of the base Quick Draw system, one can point out a few competitors that also have that feature, but you will not find any competitor that has them all. Quick Draw is the most feature rich base tarp system.

## Top Grade Warranty

Quick Draw comes with a standard 1 year warranty on manufacturing defects. The 4" top rolling wheels (including bearings), the intermediate bows and die cast corners are covered with an exclusive 5 year warranty. The Quick Draw warranty covers **BOTH PARTS AND LABOUR!** Every Quick Draw system includes a written warranty and **FREE** 6 month and 12 month inspections.

## Safety

The Quick Draw tarp system can be completely operated without the operator's feet ever leaving the ground.

## Built To Last

Quick Draw tarp systems have over 20 years of proven reliability. This top quality product maintains its structural integrity year after year. Quick Draw customers experience less downtime and more years of reliable service.

## Parts Are Ready

Combining a modular design with a framework that has been consistent over the past 17 years and serial numbers for each tarp system provides customers with the benefit of replacement parts that are always ready for shipment and always fit properly. These are important aspects of Quick Draw's commitment to keep customer's vehicles on the road longer with less downtime.

As the industry leader, Quick draw is devoted to equipping its customers with top quality products proven to last and stands behind it's commitment to excellence in customer service.

## Wheels And Track

Quick Draw's patented design provides large 4" diameter top rolling wheels and a track that does not catch dirt. High performance, high temperature range grease is used in sealed guide wheels to ensure smooth rolling in extreme weather conditions. These top quality wheels are long lasting, easier and less costly to change than other competitive tarp systems.

## Slim And Strong Headboard

Quick Draw puts strength in all the right places with its headboard featuring 3/16" aluminum plate thoroughly covering a high strength framework. All of this strength comes in a very slim headboard measuring only 5.5" from its front face to back. The headboard is front mounted to the vehicle to maximize bed space.

## Compact

When fully retracted, the Quick Draw tarp system only occupies 8 feet of bed space.

## Tarp Tensioning At Both Front And Back

Quick Draw is amongst the most versatile tarp systems by providing complete tarp tensioning capability independently at the front and back of the tarp system.

## Exceptionally Tight Tarps

Quick Draw provides extremely high tension to tarps because it makes vehicles look good, makes tarps last longer and increases fuel efficiency. Quick Draw uses only premium quality vinyl tarp material and provides in-house laser graphics service where printing quality can be controlled to the highest levels.

## No Fasteners Through Tarp

For outstanding appearance and long tarp life, there are no fasteners poking through the vinyl tarp material anywhere on a Quick Draw tarp system.

## Keeps The Weather Out

Quick Draw developed and perfected self-sealing bottom tarp edges to keep weather and road spray outside the tarp system.

## Adjustable Rear Bow

Quick Draw pioneered the idea of the adjustable rear bow to equalize tarp tension from top to bottom, make minor adjustments to compensate for tarp stretch over time and adjust tarps for different vehicle shapes and loading conditions.
